

Dr. Bennett Memorial Wristband Sale

Dr. Susan Bennett left a legacy in the world of physical therapy that will never be replaced. Her dedication to helping patients with neurological conditions has impacted the lives of thousands of people. She also taught and mentored thousands of students practicing physical therapy and her work as an educator is still felt today. With over 40 years of experience as a physical therapist and a leader in the rehabilitation of individuals with Multiple Sclerosis, it is important that we never forget the legacy of compassion that Dr. Susan Bennett left.

In honor of Dr. Bennett, the UB DPT Club is selling wristbands to commemorate not only her legacy in the field of physical therapy, but also her strength and compassion as an educator.

In recognition of her passion for nature, 75% of the funds will be donated in her honor to the National Park Foundation. The remaining 25% will help support future DPT club activities.

Wristbands are \$5 each
